

Director, PIC

PAD/PIC 77/60  
12 September 1960

Chief, PIC/PAD

Points in Favor of a National Joint PIC.

I. As requested, the following items are submitted for your consideration:

A. SECURITY would be greatly assisted in that

1. Duplication and dissemination of original material would be reduced to a bare minimum.
2. Working personnel would be under one roof and operating under one staff of security officers, following one set of security procedures.
3. Intelligence reports would be produced and dissemination controlled from one point.
4. Briefings could be coordinated and controlled.

B. DUPLICATION of effort, time, expenditures, etc., would be greatly reduced or possibly eliminated by:

1. Pooling of PI and PI Support personnel.
2. Pooling of equipment.
3. Pooling of all support aspects - photo, collateral, maps, graphics, edit, etc.
4. One-point storage of original and duplicate photo materials.
5. Coordination of requirements and the production of coordinated reports.
6. Pooling of R&D efforts and funds.
7. Coordination of briefings.
8. Concentrating on producing dependable and accurate joint reports rather than the drive for one group to scoop another group.

9. Housing all such activity in one center rather than having 2, 3, or 4 such centers to duplicate space in which to perform duplicate functions; providing adequate security in the form of personnel, ADT, etc., etc., etc.
10. Coordinating the utilization of non-PI Intelligence Specialists and consultants.
